## **Further confirmation of nkt cables' extraordinary submarine cable competence**

### **nkt cables lands Amrumbank West 33 kV AC array cable project**

**nkt cables** has entered a contract with E.ON Climate & Renewables Central Europe GmbH at a value of around €20 million for the offshore wind farm Amrumbank West.

For **nkt cables**, Amrumbank West will be another project with armoured 33 kV submarine cables. The cable will be manufactured at the production facilities in Cologne.

The German wind farm Amrumbank West will be situated in the North Sea Region, north of Helgoland and west of Amrum. The Amrumbank West wind farm consists of 80 wind turbines of 3.6 MW each.

The inner park array cabling shall be realised in 12 lines which are connected to 33 kV medium voltage switchgear on offshore substations.

The offshore substation shall transform the voltage to the level of 155 kV and transmit the power of up to 288 MW to the high voltage cable termination point on this substation.

With this project **nkt cables** again sets a landmark for infield cable solutions (33 kV with up to 90 km system length).

If you have any questions, please feel free to contact CCO Detlev Waimann on +49 221 676 0.

Kind regards,

Marc van't Noordende  
CEO, **nkt cables**

#### **About nkt cables**

**nkt cables** develops, manufactures and markets power cables and cable systems for electricity transmission (high voltage cables and accessories), electricity distribution (medium voltage cables and accessories), and electrical installations (low voltage cables). **nkt cables'** main customers are within the electricity and power sectors, building and construction, telecommunications and railway companies, the auto industry, as well as industry in general. **nkt cables** has more than 3,600 employees and a 2010 turnover of around € 1.2 billion.

**nkt cables** is owned by NKT Holding A/S ([www.nkt.dk](http://www.nkt.dk)), which is listed on the Danish Stock Exchange.
